LIQUATEC UDF SERIES GAC / MEDIA FILTERS

Are available in 10", 20" lengths, 2.5", 4.5" diameters. Liquatec GAC filters utilize high quality coconut shell carbon, resin and KDF, known to be one of the most effective media for removal of organic compounds including vocs, radon, chlorine, and bad taste odor. these cartridges combine both quality and reliability at a competitive cost.

LIQUATEC UDF SERIES GAC / MEDIA FILTERS

Are designed to effectively reduce bad taste, odor and chlorine from your water by allowing maximum contact time between the water and the carbon to ensure efficient adsorption.

LIQUATEC UDF SERIES GAC / MEDIA FILTERS

Are axial flow filters which allow water to enter at one end of the filter and forcing it to pass through the entire carbon bed before exiting the other end. Also available in a variety of size and constructed for the highest performance in general purpose drinking water applications.

WARNING: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
NOTE: A drinking water cartridge may contain carbon fines (very fine black powder). After installation and before using the water, follow the instructions for flushing the cartridge to remove fines.
NOTE: It is recommended that you flush for 20 seconds prior to using the water for drinking or cooking purposes.
NOTE: Chlorine Reduction is estimated capacity using 2ppm free available chlorine (FAC) at continuous flow greater than 75% reduction.
